

SPQM – Demonstrating Value Through Data Reporting

Purpose

CCBHC requirements put an emphasis on data collection and reporting to demonstrate value. SPQM is a state-of-the-art web based analytical and management tool that measures the effectiveness of management and clinical practices, while helping CCBHCs track and report on required measures. This data provides actionable information to make objective clinical care decisions, manage operations, develop continuous improvement strategies, demonstrate outcomes and meet reporting requirements.

Process

- Upload existing organizational data to MTM – no additional data entry required
- Monthly reporting and consultation to help organizations identify trends and adjust accordingly
- Access to the MTM Services Resource Library
- **Timeframe:** Reports ready within 2 weeks of data upload; contracts are for 1 year

Outcomes:

- Maximize revenue opportunities
- Support, monitor, measure and maintain change initiatives
- Meet reporting requirements
- Tools to adjust and maximize practices, thrive in any service delivery environment
